Maureen Aubrey

- Completed Since Last Meeting
 - Nothing
- What was suppose to be complete but not
 - Link all the admin pages all together and make sure we can access users and product pages.
 - Make sure we can add more quantity of items to the product in admin pages.

- Set up the mySql database on virtual machine and start messing around with it and connect it to my website.
-
- RoadBlocks
 - Not having enough time to complete all the work given
 - Stressed From other work
- What should be completed for next week
 - Link all the admin pages all together and make sure we can access users and product pages.
 - Make sure we can add more quantity of items to the product in admin pages.
 - Set up the mySql database on virtual machine and start messing around with it and connect it to my website.

Colin Craighead

- Completed Since Last Meeting
 - Nothing
- What was suppose to be complete but not
 - I was supposed to work on the node js end of the order and cart pages
- RoadBlocks
 - Had a lot of other class work this week, /which I prioritized over this class since I felt like we were at a good point.
- What should be completed for next week
 - Meet with Alex and link the cart to his product pages

Alex Kennedy

- Completed Since Last Meeting
 - Fixed bugs on the product pages with static file serving and local database changes
- What did not get completed this week
 - Didn't do anything, this week setting up more concrete plans
- Completing Before Next Meeting
 - Meetings with lots of people this week!
 - Ahman Thursday on Discord after 6
 - Colin Wednesday at 4 on campus
 - Tyler Saturday TBD
 - Linking my part to other parts
 - Change PG to MySQL
 - Host my pages on the server
 - Edit the routes for the server with the routes that I have set up
 - Static files (images) on the website in server.js
 - Add to Cart button linking up with the carts that Colin has set up
 - Make the product category pages with Tyler on Saturday
- Extras
 - Layer the cart icon with a counter

- Add a back button to the breadcrumb
- Roadblocks?
 - Meeting up with everyone as scheduled
 - Refactoring code to work with MySQL-promise

Ahman Woods

- Completed Since Last Meeting
 - NodeJS App set up on web server
- Completing Before Next Meeting
 - Meeting up with Alex to get database uploaded and node routes working
 - Registration and login working
- Roadblocks?
 - Too much work in other classes :(
